## Apple Developer Academy

<http://developeracademy.unina.it>

### ANNEX A

#### Indonesia Academy Applicants

##### Introduction

Are you an arts practitioner? Are you an accomplished developer? Have you got a background in humanities, or computer science, or medical science, or have you just graduated your secondary education and you're considering your path?

All are welcome at the Apple Developer Academy. Whether you are new to programming and App development or you are an accomplished coder, you will find your place at the Academy. Bring your ideas and enthusiasm, and see how you can make an impact in the world.

The Apple Developer Academy experience is based on the Challenge Based Learning (CBL) framework, which is a multidisciplinary approach to teaching and learning. Using CBL our teachers encourage students to leverage the technology they use in their daily lives to solve real-world problems. CBL (<http://challengebasedlearning.org>) is collaborative and hands-on, asking students to work with other students, their teachers, and experts in their communities and around the world to develop deeper knowledge of the subjects they are studying, to accept and solve challenges, to take action, to share their experience, and to enter into a global discussion about important issues.

At the Academy the language of instruction is English .

The Apple Developer Academy in Naples has three core curriculum areas to help students to learn the complete lifecycle of creating applications for the App Economy. The core topics will cover:

##### 1. Coding

Through the technical curriculum students will acquire the core programming knowledge enabling them to develop iOS applications, explore frameworks and express themselves through technology to transform ideas into real world solutions.

## 2. Design

The Design curriculum provides the skills for the students to understand not only the basic concepts of what design is but also what it is not. They will acquire an understanding of the form-function relationship and how to carry out different types of research related to User Interface and User Experience Design (UI/UX). They will also learn to structure a project from its inception to its conclusion.

## 3. Business & Marketing

The Business and Marketing curriculum provides the skills for the students to understand the App Economy and the App Store ecosystem. They will acquire an introductory understanding of how to market their apps in the fast changing and ever evolving competitive App Store landscape. They will also have the opportunity to explore how to turn their apps into a potential business, and understand what is required to start - and run - their own company. Finally, all students will gain the skills necessary to be successful as an employee in an existing company.

Students will also have the opportunity to practice and improve their “soft skills” (emotional intelligence, adaptability, ability to collaborate and negotiate, situational awareness, ability to communicate, etc.) in the overall program at the Academy.

The Apple Developer Academy students create Apps as part of the curriculum, and fully own the Intellectual Property of what they create during their time at the Academy.

For the academic year 2020/2021 the Apple Developer Academy will welcome on board **378 students**. The selected students consist of 323 candidates who have applied for the default selection procedure (**Document reference: AppleDeveloperAcademyCall\_20\_21**) plus 50 more candidates who have applied for the foundation announcement (**Document reference: AppleDeveloperAcademyFoundationCall\_20\_21**) and 5 more candidates who have applied for the Apple Developer Academy in Indonesia announcement (**Document reference: AppleDeveloperAcademyIndonesiaCall\_20\_21**). If less than 50 applicants are selected from the Foundation Announcement (Document reference: AppleDeveloperAcademyFoundationCall\_20\_21) or if less than 5 applicants are selected from the Apple Developer Academy in Indonesia announcement (Document reference: AppleDeveloperAcademyIndonesiaCall\_20\_21), then Federico II reserves the right to admit more than 323 candidates through the default procedure (Document reference: AppleDeveloperAcademyCall\_20\_21) so that the total number of students is 378.

Below is a short description of the path:

### 1. Structure of the classes

Classes are formed by two parallel student cohorts, associated, respectively, with a morning (9 am to 1 pm) slot and an afternoon (2 pm to 6 pm) slot.

- Expected start date of courses: Beginning of January 2021
- Expected end date of courses: Beginning of August 2021

## 2. Application form and registration procedure

The application form must be submitted exclusively on-line through the following website: [www.developeracademy.unina.it](http://www.developeracademy.unina.it). The on-line registration is available from the publication date of this announcement, and will close mandatorily (and under penalty of exclusion from the selection procedure) **at 2pm (GMT+2) of August 28<sup>th</sup> 2020**. Any Indonesian Academy applicant who is not accepted can still apply to the Academy through the standard application process.

In order to be admitted to the selection each applicant will have to be provided with a personal email address. The on-line application procedure is based on the filling of an on-line application form as described below.

1. Go to the website [www.developeracademy.unina.it](http://www.developeracademy.unina.it).
2. Select "Register as Indonesia Academy Applicant".

The applicant must then complete a form making sure that:

- a. All the requested data have been inserted;
- b. The following documents have been uploaded: Curriculum vitae in European format; Certificate of passing Indonesia exam provided by Binus University, Ciputra University or Infinite Learning; copy of an identity document;
- c. Check the responsibility assumption box about the truthfulness of the entered data;
- d. Check the "I am not a robot" captcha box;
- e. Click on the "Send" button.

Failure to comply to the aforementioned provisions will prevent admission to the selection and, in any case, the exclusion from the procedure.

### A.3 Selection procedure

In order to be eligible for the Apple Developer Academy, applicants:

- must not have already attended the Apple Developer Academy in Naples during academic years 2016/2017, 2017/2018, 2018/2019, 2019/2020;
- Must have taken and passed the written exam to an Apple Developer Academy in Indonesia in 2020.

The selection will be based on the outcome of a motivational interview.

#### Motivational interview

The applicants will be invited to a motivational video-conference interview, in English, during which they will have a chance to present their own portfolio of competences. A maximum of **40** points can be earned with the interview.

During the interview, applicants might be asked:

- 1) to provide a brief presentation of their curriculum vitae;
- 2) to explain the professional reasons grounding their application;
- 3) to describe their career perspectives as a result of the course;
- 4) to illustrate the technological issues they are more interested in;
- 5) to specify the application areas in which they believe to be able to develop their activities

under the program;

6) to provide a description of their individual and professional characteristics;

7) to provide a description of their creative skills;

8) to discuss their experience and motivation when applying to an Indonesian Developer Academy.

After completing this phase, the top **5** applicants will be invited to attend the Academy classes. They will become part of the 2020/2021 Developer Academy class, which will be divided in two cohorts (morning and afternoon). In the event of a tie, the younger applicant shall prevail. The ranking will be scrolled should any of the selected candidates renounce his/her seat at the Academy.

### **Please note**

**The students who are not in the list of the admitted Indonesia students can apply for the Apple Developer Academy in accordance with the default selection procedure described in the Student Call and related Annex for the Developer Academy.**

#### **A.4. Location**

The training will take place at the Apple Developer Academy, Università degli Studi di Napoli Federico II, Campus of San Giovanni a Teduccio, Corso Nicolangelo Protopisani 70, Naples, Italy.

#### **A.5 Attendance of the Classes**

Class attendance is mandatory. Participants are required to respect the minimum limit of attendance, which is 80% of the scheduled hours.

#### **A.6. Scholarships and economic support funds**

There will be both monetary rewards and an attendance allowance for those who successfully complete the Academy experience. They will be delivered at least one month after the end of the project. They will also be subject to constraints that come directly from the European Commission policies (associated with the funds being leveraged through Regione Campania).

In order to be eligible for the economic support, the applicant must:

- hold a High school diploma issued by upper-secondary educational institutions or, if not obtained in Italy, an equivalent qualification. The diploma must have been obtained no later than scholastic year 2019/2020
- be unemployed (under the current regulation<sup>1</sup>) and preserve the state of unemployment for the entire duration of the course).

The applicants commit themselves to providing to the Administration Office, when required, any documents needed in order to prove the requirements of the call.

If Apple would decide to award a financial support to the students, this support will be not compatible with the Regional contribution.

---
