the Pier @Protopisani - 2020/2021

The Apple Developer Academy Alumni program

The vast ocean awaits. The stormy waters and the infinite blue skies. The tropical nights and the freezing mornings. The rewarding hauls and the menacing pirates...

Before setting sail to conquer the seven seas you have the opportunity to dock at the Pier @Protopisani. In the Pier you'll have the chance to fine-tune your ships and stock-up for your long voyage.

1. The Concept:

Stay up to another year on the third floor at San Giovanni as an intern of the Academy. The Apple Developer Academy is recruiting up to 50 students to help deliver various projects for external stakeholders! Students will apply and are selected individually. The developers of the Pier will keep their Mac and their iPhone for the duration of their internship, and will have access to Academy resources and workshops.

2. The Projects:

Throughout the year you will have opportunities to work on various external stakeholder projects, enabling you to further develop your time management and project management

skills. In addition, you will also get freelancer experience by using your expertise to help other groups.

The Pier will continue its strong relationships with third parties, such as NGO organizations, and the development of projects focused on our local community, so during your stay you will be contributing to at least one of them. By working on tasks for these projects, you will learn about scoping projects and hone your skills in communicating with a range of external stakeholders.

Your performance will be measured by a combination of your contributions to external stakeholder projects, commitment and dedication to the program and to your team.

You will retain intellectual property of personal projects you may eventually develop, along with your chosen group members, as you are used to from your Academy experience. However, you will not necessarily retain intellectual property of any external stakeholder projects.

The Pier Manager will define the groups for the external projects, based on the scope of the project, Pier members competencies and Pier members aspirations.

The Pier member will also be asked to contribute to the Academy by helping build tools, or assisting the mentors, and also helping the Apple Foundation Program across the Campania region.

3. Applications:

The selections will be made by skill profiles, considering the following criteria:

Commitment

Collaboration and team work

Domain on the field you are applying for

Communication (english/public speech)

Skill profiles include:

Project/Product Management

Frontend Coding

Backend Coding

Design

To submit your application, fill in this online form: [ThePier2020Application](#), and upload the contents requested.

The selection of the individuals will be done by the Scientific Committee of the Academy in consultation with the mentors. After the application being reviewed by the Committee, individual interviews may be conducted with a shortlist of applicants. While the process will try to accommodate the first individual profile preference, the final profile the selected applicant will be assigned to is up to the Scientific Committee.

As developers set sail towards their careers during the year, we will offer replacement seats to the applicants who can better fulfil the positions.

Applications need to be received by May 24th at 11:59pm (CET), no exceptions will be allowed. The selected candidates will be announced on June 2nd and need to confirm their participation until June 3rd, at 12pm (CET).

4. Eligibility:

- I. Hold a High school diploma issued by upper-secondary educational institutions or, if not obtained in Italy, an equivalent qualification. The diploma must have been earned no later than scholastic year 2018/2019.
- II. Have attended the Apple Developer Academy in Naples in 2019/2020.

5. Rules of Engagement:

Just like the Academy, you need to be physically present at San Giovanni to perform your work for the Pier (unless otherwise agreed upon). You will be required to badge in and badge out, and are expected to deliver at least 20 hours per week towards projects, that will be distributed according to the needs of the program. Developers not meeting the attendance requirements may be replaced with more eager applicants at the discretion of Federico II University staff on advice of the Scientific Committee.

6. Duration and attendance:

You will join the Pier at the end of the Academy year and your membership of the programme is for a maximum of 12 months.

Further details on starting dates and attendance will be announced later.

Every 3 months you will deliver work on the assigned project, according to agreed milestones such as competitions, challenges or defined projects with external partners in fields such as education, international development, green economy, blue economy,

personal services, social and health services, enhancement of heritage and cultural activities, or entrepreneurship. Your stay at The Pier @Protopisani will continue if these milestones are met. The last day of the Pier will be at the end of June 2021.

Successful candidates are expected to be able to spend time with the current Pier members during the whole month of June to take part in the handover of the existing projects.

7. Rewards:

There will be monetary rewards for those who successfully complete their Pier experience. Such rewards will be delivered at least one month after the end of the project. They will also be subject to constraints that come directly from the European Commission policies (associated with the funds being leveraged through Regione Campania). The applicant has to declare in the on-line form whether he/she requires the rewards or not.

In order to be eligible for a reward, the applicant must:

- I. hold a High school diploma issued by upper-secondary educational institutions or, if not obtained in Italy, an equivalent qualification. The diploma must have been obtained no later than scholastic year 2018/2019.
- II. have attended the Apple Developer Academy in Naples in the academic year 2019/2020.
- III. be unemployed (under the current regulation*) and preserve the state of unemployment for the entire duration of the course. In order to demonstrate the above mentioned requirement, the applicant has to send the so-called DID (*Dichiarazione di Immediata Disponibilità*) certificate at latest 15 days after the publication of the ranking of the admitted students to the Pier Program.

1. At the end of the training course, the applicants commit themselves to providing the Administration Office with any further documents needed in order to prove that they preserved their state of unemployment for the entire duration of the course.

Naples, 15 May 2020.
